

## Female Hygiene :- Sanitary Pad Disposal Machine

### About Us

Bijson Innovations Pvt. Ltd. Is a leading upcoming waste management and clean energy company. We also promote products for personal hygiene which in turn helps in solid waste management.

### Our Product SPD-10

Disposal of the used sanitary pads has been a very common problem everywhere. Women do not like to carry their used sanitary pads to a household bin in front of family and friends. She doesn't keep it in normal bathroom bin as it leads to embarrassing visuals and smells. Though sometimes she packs it in plastic bag and drops it in dustbin. But the most common way she uses is, flush it into the drain. Both the above ways of disposing sanitary pads creates problems. The flushing in drain results clogging in drain (drainage line chock-ups / plumbing line blocking problems) and throwing in dustbins results in health related problems due to hazardous contents in the used sanitary pad. If it remains on the landfill site or remains in waste water, it may release hazardous microbes & chemicals like fungi / fungus, bactericide, fibers, toxins, dioxin & other

poisonous substances which may result in serious diseases like cancer.

The correct way to destroy the used sanitary pads is "incineration" and converting it into ash, which is very easy with our "automatic sanitary pad disposal system" The unit dispose off used sanitary pads by a scientifically proven way instantly.

Our sanitary pad disposal unit - " SPD - 10 " is very easy to operate, very compact in size, fully automatic, cuts off after burning, can be mounted in toilets, require less than 10 minutes to burn the used sanitary pad, having insulated body & led indicators on it. The unit is a machine / furnace which burns the used sanitary pads.

## Applicability of product

## Technical Specification

Type	Wall / Floor mounted	Unit Dimension	310 x 490 x 570mm.
Weight	20kg. (Approx.)	Emission outlet	Provided
Capacity	10 pads / batch	Doors	Load and Ash tray.
Power Cons.	800 Watt	Residue ash	>5gm. Ash per pad.
Body	M.S. Powder coated/S.Steel	Insulation	Ceramic and Glass wool
Power saver	Provided with auto power off.	Input Voltage	110-230V

## Advantages

- Scientific disposal of used sanitary pad.
- Helps in building female confidence
- Easy to operate
- Reduce health hazardous
- Wall mountable, can be installed inside the toilet.
- No smoke and smell inside
- Auto power cut off for safety of users
- Low power consumption
- Land fill reduction
- Help in Reducing pollution and environment friendly
- Reduce plastic bag usage

## Operating Method

Open The Top Sliding door

Drop The pad Into The Machine Then Close The Sliding Door

Press Start Button And move on!

**SPD-10**  
Sanitary Pad  
Disposal Machine

- Bio CNG Plant
- Organic Manure Plant
- ICS - Biomass Stove
- Sanitary Pad Vending Machine
- Bio Coal
- Biomass Gasifiers
- Water Harvesting system
- Waste Audit
